

Color Strata Quilts with Rob Appell

Spend a Day with Rob Appell, and learn from his newest experiment in color strata building. These quilts were first created as a part of the “Inspired by Libby Lehman” exhibit. A group of quilt designers were asked to create works of quilt art that could be auctioned off to help raise money for Libby and her Family. We were asked to view her exhibit in Houston a year back, and create a fiber piece that was 30” x 30” . Well, I found the strata in her quilts quite intriguing, and so my newest quilt journey began. I made a bunch of Color Strata using the high density cotton solids from Michael Miller Fabrics, and began constructing quilt after quilt. These Strata quilts are so fun, easy and a great canvas for our machine quilting.

The workshop will focus on cutting and constructing the various types of strata, adding our pop colors, and building a quilt top. The choices in designs are limitless, and I must warn you,

These Quilts Are Highly Addictive!

Supplies

- Your Sewing Machine, in good working order.
- Duel feed or Walking foot if you have one, lots of strip piecing for this workshop.
- Cutting Mat, Long Ruler and Rotary Cutter.
- **Fabric** - Color Strata Jelly Rolls, Fat Quarter Packs, or anything from your stash.
20 to 40 colors, solids preferred, but I love creativity, so bring what you love too. Colors should have about 5 to 7 choices per color family or more, we will be creating a gradient of color.

Fabric quantity will vary based on quilt size,
a Jelly Roll is good for 45” x 45”

- **More Fabric** - Pop color, something to set your colors into hyperdrive. I like Jet Black, White Fairy Frost, or a complimentary color to your strata color choices. 1 Yard
- maybe a few straight pins
